ABOUT ME

As a Front-End Developer and over 5 years of experience, I am deeply passionate about staying at the forefront of the latest trends and techniques in my field. My extensive knowledge of Javascript, particularly in Vue JS, has allowed me to take on a diverse range of projects, from simple landing pages to complex applications with hexagonal architecture.

I am committed to delivering high-quality results and enjoy collaborating with others to solve challenging problems. In addition to my strong leadership skills, I possess a proactive approach to problem-solving and continuously strive to improve my skills.

EXPERIENCE

July 2021 - Now ○ Prime IT

Front-end engineer: I lead a team developing and implementing a Vue project, which involved migrating an old motosharing administration panel for Acciona. My contributions included utilizing the single-spa library for microfrontends and adopting a hexagonal architecture, which improved the application's performance and scalability.

Sept. 2017 - July 2021 ○ Signlab

Full-stack developer: I began my career at Signlab as a Junior Software Engineer, where I worked on various web application projects utilizing Vue, CodeIgniter, and Ruby on Rails frameworks. Over time, I gradually gained more responsibilities and became a Team Lead. I oversaw the entire project lifecycle, from the initial analysis and client communication to development and final delivery.

March - June 2017 ○ Dobuss - Internship

Full-stack developer: As an intern at Dobuss, I developed an administration panel for managing clients, ongoing projects, and users. I utilized my skills in web development and database management to design a user-friendly interface and ensure that the application was easy to use.
